

CLIMATE CHANGE PANEL SOUNDBITES

CLIMATE CHANGE IS COMPLEX

From food security, inequality, rising sea levels, erratic weather patterns and energy transition to say the least. Panellists urged viewers to adopt a critical lens when analyzing climate issues, and to contextualize mitigation and adaptation policies.

CLIMATE CHANGE EXACERBATES INEQUALITY

Erratic and drastic weather patterns has caused many agrarian communities to combat volatile food security chains, some of which has manifested itself in food wars.

CLIMATE CHANGE IS ON THE BACKBURNER

COVID-19 has shifted the urgent agenda of Climate Change with the COP26 postponed until Nov 2021. Countries are focusing their attention and resources on COVID-19 mitigation effort amidst this salient global issue.

COGNIZANT OF MULTIPLE VIEWPOINTS

Be purposeful in your advocacy efforts and don't be afraid to start conversations with new individuals, and to converse deeply about an issue's complexities.
